

如何替换图片

图片如果要进行修改和替换的话，**需要满足图片格式一样**，图片格式不一样的话就不能替换。

图片格式包括 jpg、png、webp 等

进入后台多媒体管理界面--点击媒体库

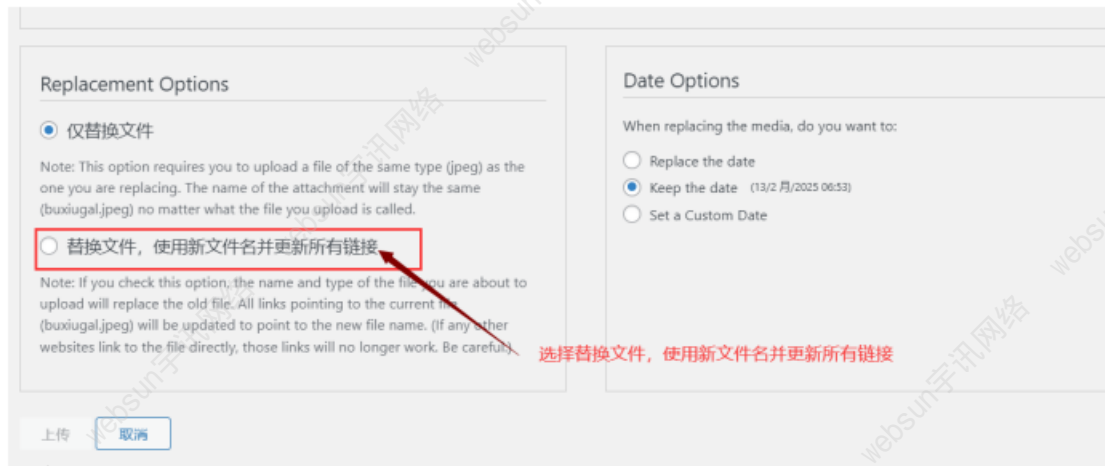

点击图片，点击图片的上传新文件的文档

点击选择图片，上传图片

下面选择替换文件，使用新文件名并更新所有链接，然后上传图片就可以。

The image shows a dialog box with two main sections: "Replacement Options" and "Date Options".

Replacement Options

- 仅替换文件
- 替换文件，使用新文件名并更新所有链接

Note: This option requires you to upload a file of the same type (jpeg) as the one you are replacing. The name of the attachment will stay the same (buxiugal.jpeg) no matter what the file you upload is called.

Note: If you check this option, the name and type of the file you are about to upload will replace the old file. All links pointing to the current file (buxiugal.jpeg) will be updated to point to the new file name. (If any other websites link to the file directly, those links will no longer work. Be careful).

Date Options

When replacing the media, do you want to:

- Replace the date
- Keep the date (13/2月/2025 08:53)
- Set a Custom Date

Buttons: 上传, 取消

Annotations: A red box highlights the second radio button in the "Replacement Options" section. A red arrow points from this box to the text "选择替换文件，使用新文件名并更新所有链接" located to the right of the dialog box.
